

# AgroNetra ĩ AI Crop Health Analysis Report

**Farmer Name:** Shantanu

**Location:** Sagar, Madhya Pradesh, India

**Analysis Type:** Crop Health Analysis

**Disease Detected:** Leaf Blight

**Confidence Score:** 94%

**AI Insights:**

The uploaded crop image indicates symptoms consistent with Leaf Blight. The disease is at a medium severity stage and can be effectively controlled if addressed immediately.

**Recommended Actions:**

- Apply recommended fungicide within 48 hours.
- Avoid over-irrigation to prevent moisture buildup.
- Monitor crop condition daily for the next 5 days.

**Sustainability Note:**

Timely disease management can reduce crop loss, optimize resource usage, and improve overall farm sustainability.
